The NOSTA Group is growing in the Netherlands – New office of NOSTA Logistics B.V. opens in Venlo

Ladbergen, 03.05.2021 – On 1 May 2021, Rotterdam-based NOSTA Logistics B.V. has opened a second office in Venlo. With this step, NOSTA Group is expanding its footprint in the Netherlands and extending its service portfolio for customers.

At the Venlo location, a team of the global full-service logistics provider will specialise primarily in road freight and handle Europe-wide LTL and FTL shipments. In addition, the Venlo team will provide comprehensive logistics consulting to its customers helping them optimise their supply chains.

In addition to the strategically favourable location on the A67 motorway and the proximity of the Ruhr industrial area, other significant reasons favoured the German-Dutch border city. "Venlo has become a logistical hotspot and an important hub in the Benelux region", says Harrold Dost, Managing Director of NOSTA Logistics B.V.

Thanks to the dense infrastructure and connections to the seaports of Rotterdam and Antwerp, as well as the airports of Schiphol, Maastricht Aachen Airport and Brussels-Zaventem, the conditions for international logistics are ideal. Against this background, NOSTA Logistics B.V. also aims to establish sea and air freight activities at the Venlo location in the near future, serving the local market with local people.

NOSTA Group:

More than 750 employees. Over 40 locations worldwide. Successfully operating in the world of logistics for over 40 years. The NOSTA Group is a family-run, internationally active full-service logistics service provider, which today consists of NOSTA Holding GmbH (freight transport by all modes of transport, warehousing and contract logistics) and NOGA GmbH (individual load carrier production). In addition to the optimal planning and implementation of logistics processes, the NOSTA Group focuses on the development of individual industry solutions and forward-looking concepts for its customers. High-quality logistics services, reliability and proximity to the customer are always the focus of the logistics experts.
